

AgPro Top Facility

Asmus Farm Supply
Rake, Iowa

The office space is fully heated and cooled with geothermal. Special fans in the warehouse save 700 gal. of liquid propane every week and keep a 1° difference between the floor and ceiling.

The 400,000+ gal. of bulk crop chemistry products are plumbed and labeled for easy and accurate repackaging.

SecureTracs software details the use of the company's 8,400 asset tanks. It keeps records of product, quantity, time and return details.

A warehouse manager helped developed a "car wash" for tote tanks that uses spray nozzles and decreases product carryover.

The company has 22 employees at its headquarters, which was designed with a professional and welcoming entrance.

The plant nutrition facility (right) has 371,500 gal. of storage under roof and a 1.5-million-gal. UAN tank.

The company's seed treatment business has grown to include the new AFS Select and AFS Protect products.

5 Coolest Things At This Facility

1 Built For Growth. This headquarters location is one of four company-owned facilities, and it totals 50,000 sq. ft. of heated space.

2 WiFi In Every Warehouse. SecureTracs software is used to manage the tank fleet and comply with all EPA repackaging requirements.

3 Agronomic Focus. Sales staff strive to be Certified Crop Advisers. They sell seed, seed treatment, crop chemistry and plant nutrition.

4 Fast Fills. The nearby plant nutrition facility has a Kahler Automation system for custom blends and can load a bulk tanker in 12 minutes.

5 Facilities Reinforce The Brand. Company warehouses should be "showroom ready," says Amy Asmus, who is company vice president.
