

AgPro Top Facility

Peterson Farms Seed
Harwood, North Dakota

Carl Peterson and his wife Julie founded the company on the site of Carl's family farm, which was established more than 100 years ago.

5 Coolest Things At This Facility

1 Company HQ. This facility is headquarters for Peterson Farms Seed, the largest independent corn and soybean seed company in the upper midwest.

2 Preserve Quality. No seed drops more than 7'. The facility is designed to protect and preserve quality and germination from intake to finish.

3 Kid-Gloves. There are no augers in the facility—only conveyors. This handling method protects the seed from cracking and splitting.

4 High Capacity. A Westrup air screener separates foreign material. A color sorter/electric eye kicks out undesirable colors and foreign material.

5 Recent Expansion. Six 10,000-bu. bulk bins for incoming and conditioned product were added. There's now a second truck scale.
