

Quick On Their Feet

4 Rivers MFA
Ravenwood, Missouri

5 REASONS TO LOVE THIS FACILITY

1 FRESH FUNCTIONALITY
After breaking ground during spring 2022, the Ravenwood location was able to retail fertilizer by October. It was fully functioning in July 2023.

2 CONSOLIDATED FOR MAXIMUM EFFICIENCY
4 Rivers MFA consolidated agronomy services from five locations to the Ravenwood location.

3 A SUCCESSFUL FIRST SEASON
This facility serves producers working anywhere from 30 acres to 3,000 acres. It has seen outstanding yields from its first season consolidated at this location.

4 ADAPTABILITY IN FOCUS
Merging several existing services into one was a challenge that led to more efficiency overall.

5 LESS TIME IN IDLE
The improvements to the speed at which this co-op can ship out product prevent downtime in the fields. MFA has also been able to reduce its hours of operation due to the increase in efficiency.

FULL-SERVICE CHEM & SEED
This facility is equipped with four 3,000-unit tanks of seed capacity. 4 Rivers MFA also offers seed treatment with a Bayer on-demand treater.

TEMP-CONTROLLED
4 Rivers MFA can re-bag inside the heated warehouse. This allows the team to pretreat seed early in the season.

HIGHER VOLUME
The dry fertilizer warehouse has a 6,400-ton capacity. Nine separate bays allow the team to handle different product volumes.

FERTILIZER IN A FLASH
With a Doyle Flightstar Drag Conveyor, the facility can unload up to 24 tons in eight minutes. Blend and load take just up to 10 minutes for 30 tons of dry or 5,500 gal. of liquid fertilizer.

DISPATCHING HUB
The office building allows space to accommodate operators and truck drivers from other stores as needed. Using Raven AgSync, the team is able to monitor applicators and drivers as well as workload.
