

# Leap Into The Future

## MORE STORAGE

The dry fertilizer capacity totals 10,570 tons across five primary bins and three micronutrient bins. The first product was brought under roof on April 19, 2021.

## DOUBLE LOADOUT

The current blend tower feeds into one of the two enclosed loadout lanes. This provides the site with additional expansion options.

## TOP-NOTCH TOWER

The Sackett-Waconda vertical blend tower provides the team with new capabilities for speed in mixing and loading.

## ELEVATED CONTROL ROOM

The second control room is positioned above the first control room, providing a bathroom for the operator.
